

## How to Download BCI433 Lab Documents from the ZEUS Server

Except for lab 1, which has been posted on Blackboard, all labs will be available on the ZEUS server only, and you need to download (or copy) lab documents from the ZEUS server to start your labs. All BCI433 lab documents are on ZEUS server's IFS with the PATH of "Root file system /BCI433". There are 2 ways/tools for you to download (or copy) these lab documents. Here are detailed instructions:

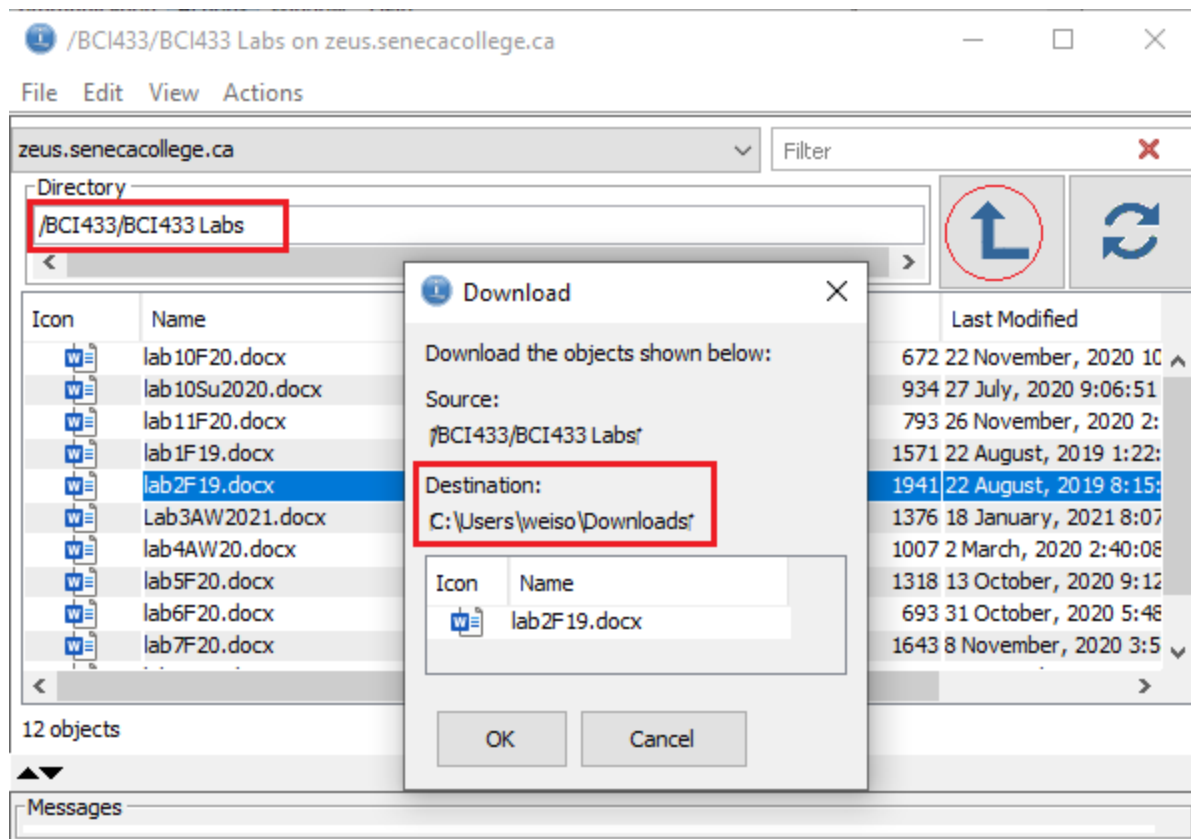

The first way is to use RDi. If you have installed IBM RDi 9.6 on your computer, go to Remote Systems view, then copy lab documents from the path under **IFS Files** and paste to **Drives** or **My Home** under the **Local** folder (see the screenshot). At end, use Windows' File Explorer or MacOS's Finder to locate and open the lab documents on your computer.

The second way is to use ACS's Integrated File System. Here is how to start:

Then navigated to IFS folder `"/BCI433/BCI433 Labs"`, and right click to download file(s) to your PC's folder.

The third way, you can use **Navigator for i** to download lab documents. Launch **IBM i ACS** (Access Client Solutions), then click **Navigator for i** from the **General** menu in the left panel. Log in with ZEUS user ID/profile and password, and you'll get into IBM Navigator for i on a web page. Expand the item File Systems in the left panel until you find the lab document files, and right click lab files to download.
